

IMPORTANT NOTICE TO ALL AP10/AP20 USERS

Effective December 31st, 2014, Verizon Wireless will discontinue all analog circuit-switched data (CSD) communications support for North American clients. The termination of all CSD circuits will affect owners of the older AP10 and AP20 Phase Identification Systems communicating via this analog platform. Owners of newer digital IP based AP30 systems will remain unaffected.

In reaction to Verizon's notification, EDM/Avistar is offering a trade-in discount pricing program to upgrade to the AP30 digital platform.

Please contact your regional product representative or EDM/Avistar for more information.
