

DISTRIBUTION UTILITY ENGINEER

Our Phoenix office is seeking a **Distribution Utility Engineer** to work directly with clients, field personnel and engineering staff on various types of overhead distribution projects ranging from minor equipment revisions to complete pole changeouts, evaluating existing field data and using typical pole line design software to determine if the pole is NESC compliant. If you like challenging assignments, are self-motivated, and want to grow your career, consider joining the EDM Team.

Responsibilities

- Assist technical staff in completing engineering functions, review and stamp work being sent to clients
- Work with clients to ensure schedules are being met
- Work with drafters in updating assigned tasks
- Assist in the development of new clients
- Determine cost alternatives to meet NESC requirements for all pole attachments
- Assist field personnel in collecting good useable data as required
- Meet with clients periodically, travel to job sites and work directly with field personnel, testing labs and research facilities

Qualifications

- Bachelor of Science in Civil or Electrical Engineering, from an accredited ABET university/college is required
- 5+ years of related experience in overhead electric distribution facilities is required
- Arizona PE is required
- Creative problem solving and relationship building skills are required
- Strong organizational and project coordination abilities are required
- Working knowledge of NESC is preferred
- Distribution overhead line design experience is preferred
- Distribution overhead equipment and installation techniques are preferred
