

## DISTRIBUTION ENGINEER

Our San Diego office is seeking a **Distribution Engineer** to work directly with our clients/vendors and field personnel revising overhead and underground distribution standards, assessing technical data on new products and working with testing labs and research facilities. If you like challenging assignments, are self-motivated, and want to grow your career, consider joining the EDM Team.

### Responsibilities

- Update existing and create new construction standards
- Review and recommend changes to Safety standards
- Electrical technical analysis to support new product selections
- Analyze failed materials and products - root cause, prevention and improvement
- Determine cost alternatives to meet GO95 or NESC requirements
- Develop scope of work for clients that accomplish their needs technically and financially
- Update clients on progress of technical work and any changes to schedules
- Meet with clients periodically, travel to job sites and work directly with field personnel, testing labs and research facilities
- Assist in development of new clients

### Qualifications

- Bachelor of Science in Engineering (Electrical or Mechanical) from an accredited ABET university/college or Bachelor of Science in Engineering Technology (Electrical) with relevant experience is required; Power engineering discipline is preferred
- 0 – 3+ years of experience with electric utility overhead, underground equipment and installation techniques is preferred
- Distribution overhead line design and construction experience is preferred
- Strong organizational and project coordination abilities are required
- Creative problem solving and relationship building skills are required
- Must be authorized to work in the U.S.
