

## Engineer III/IV

Our Phoenix office is hiring a Civil/Electrical Engineer Level III or IV. The successful candidate will have an active role working directly with clients, field personnel and engineering staff on various types of overhead distribution projects ranging from minor equipment revisions to complete pole changeouts, evaluating existing field data and using typical pole line design software to determine if the pole is NESC compliant. If you are a self-motivated professional with at least 5 years of related experience in overhead electric distribution facilities, and want to grow your career, then we are looking for you to join our team!

### Responsibilities:

- Assist technical staff in completing engineering functions, review and stamp work being sent to clients
- Work with clients to ensure schedules are being met
- Work with drafters in updating assigned tasks
- Assist in the development of new clients
- Utilize experience and engineering techniques to determine cost alternatives to meet NESC requirements for all pole attachments
- Assist field personnel in collecting good useable data as required
- This position requires periodic travel to job sites and client meetings within Arizona.

### Qualifications:

- Bachelor of Science in Engineering, Civil or Electrical, from an accredited ABET university/college
- Arizona PE is required
- Creative problem solving and relationship building skills are required
- Strong organizational and project coordination abilities
- Working knowledge of NESC is preferred
- Distribution overhead line design experience is preferred
- Familiarity with overhead distribution line design processes is preferred
- Familiarity with overhead equipment and installation techniques is preferred
