

## Engineer I

The Engineer I position will prepare or assist in the preparation of engineering designs, specifications, standards, studies, cost estimates and the development of sound technical recommendations, in support of projects and tasks managed by others within EDM's electric utility departments.

### Tasks

- Apply a high level of technical expertise to solve engineering and operational problems.
- Direct and assist team members, both EDM employees and outside contractors, in the completion of their work.
- Coordinate and direct small projects and tasks, including development of work scope, budget, and schedule.
- Coordinate input from, and participation with, various departments within EDM as needed to meet project objectives.

### Skills

- Using logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems.
- Working knowledge of Microsoft Office Suite
- Working knowledge of engineering/construction software
- Good communicator between technical (engineering) & application (construction)

### Work Experience

- Entry Level/intern work experience in an engineering environment or
- Exposure to construction or surveying environments

### Education

- Bachelor of Science Degree in civil, mechanical or electrical engineering from a four-year accredited college/university
- Passed Fundamental of Engineering Exam (FE)

### Desired

- Exposure to electric utility environments either in intern roles or engineering, operation and maintenance, or construction.
- Understanding knowledge of NEC, NESC, OSHA, ASTM

Since EDM's incorporation in 1982, the key to the success of our consulting, research and development services has been our team of dedicated professionals and support staff chosen for their unique yet complementary abilities.

EDM has become a leader in the electric utility, energy, construction and communication industries by merging excellence in engineering and science with a genuine concern for our clients' needs.
