

UTILITY ENGINEER

Our Billings, MT office is seeking an entry level **Utility Engineer** to work directly with our engineering staff on various electrical overhead and underground projects under supervision of our senior staff. If you like challenging assignments, are self-motivated, and want to grow your career, consider joining the EDM Team.

Responsibilities

- Develop models of existing overhead electrical and communication facilities utilizing various line design and pole loading software such as PLS-CADD and O-Calc
- Work with field personnel to collect data needed for modeling overhead electrical and communication facilities
- Assist in evaluating feasibility of adding additional communication facilities to the existing infrastructure meeting utility and NESC/GO-95 code requirements while minimizing impact on existing facilities
- Assist field personnel in laying out new underground communication facilities

Qualifications/Experience/Education:

- Bachelor of Science in Engineering (Civil, Mechanical or Electrical) from an accredited ABET university/college is required; Power engineering emphasis is preferred
- Engineer in Training (EIT/FE) preferred and desire to work towards obtaining PE license is required
- 1 – 3+ years of experience with overhead and underground electric utility is preferred
- Distribution overhead line design and construction experience is preferred
- Positive, team-oriented, and professional attitude is required
- Strong organizational and project coordination abilities are required
- Creative problem solving and relationship building skills are required
- Must be authorized to work in the United States on a full time basis
